

## Specifications for 5000 Series Auto Gate

### SCOPE OF OPERATION

The 5000 series automatic opening gate is used to control medium/high volume pedestrian traffic into and out of specific areas. It's unique design, soft closing arm and electric locking feature make it ideal for any controlled access applications.

### MATERIALS

All materials meet the ASTM standards as set forth by the materials industry.

- Full stainless steel construction type 304. 1 1/16" diameter 16 ga arm.
- Base plate constructed of 5/16" thick plate. 11 ga steel inner frame.
- 16 ga stainless steel outer cabinet. Heavy duty upper and lower arm bearings.

**FINISHES** Full stainless steel polished to a #4B finish.

### OPERATION

- Allows for one way passage. The direction is set during fabrication.
- Fully automatic opening and closing.
- Heavy duty gear driven motor for years of reliable service.  
Panic breakaway provides an exit path in case of emergency.
- 110 vt operating system.
- Activation is achieved by supplying a dry contact input through a push button or access control software.
- Standard indicating sign included

### OPTIONS

- Indicating lights red/green.
- Push button.
- Electronic counter.
- Custom signage.
