

## 9 Gauge x 2" Chain Link Fence Fabric Galvanized

9 gauge galvanized chain link fence fabric stretched on a commercial or industrial frame is the best choice for a fence installation of the highest quality. 9 Gauge chain link fence fabric is by far the most popular choice for quality residential, commercial, and heavy duty industrial fencing applications. Our 9 gauge chain link fence is strong, secure, and made to last!

Our heavy-duty 9 Gauge chain link fence is often found in the following applications:

- Federal and State Prisons
- Airports
- Embassy's
- Construction Sites
- Metra Train Station
- Harbors / Ports
- Military Bases
- Power Plants

Barbed End (Twisted)

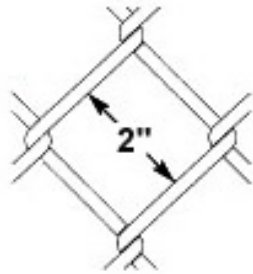

Knuckled end

## Specifications

9 gauge chain link fabric is available in either Galvanized After Weave (GAW) or Galvanized Before Weave (GBW) finishes which come in a 1.2 oz coating, meeting ASTM A 392-96 Class I specifications.

**About mesh size:** The galvanized fabric mesh for 11-1/2 gauge measures 2-1/4". The 11, 9, and 6 gauge galvanized mesh measures 2". Mesh size is the measured distance between two parallel sides (see illustration).

**Note about gauges:** The smaller the number, the heavier the fabric; henceforth 9ga. is heavier than 11ga.. We recommend 11ga. for residential jobs and 9ga. for commercial jobs. Heavier gauges are not only stronger, but have a better finish; The heavier the gauge the longer it may be 'hot-dip galvanized' to prevent rust and corrosion.

Fence Height	Weight per 50' Roll
3'	109 lbs.
3-1/2'	125 lbs.
4'	146 lbs.
5'	178 lbs.
6'	209 lbs.
7'	246 lbs.
8'	281 lbs.
10'	341 lbs.
12'	420 lbs.
