

**ATLAS**  
**MANUAL REVOLVING DOOR**

- The prestige solution for the entrance into any building
- The ATLAS brings together a combination of aesthetics and reliability all in one revolving door

**APPLICATIONS**

- Suited for applications requiring high volume access and a draft block between the internal and external environments
- Used extensively in applications such as office blocks, banks, universities, public buildings and health clubs

**DESIGNED FOR**

- Installation on the facade of a building
- Severe operating conditions

**AVAILABLE CONFIGURATIONS**

- 3 wing (120°) and 4 wing (90°)
- Manual revolving door and security revolving door

**SECURITY RATING**

# UNIQUE FEATURES OF THE ATLAS MANUAL REVOLVING DOOR

- Ultra heavy-duty manual revolving door
- Designed by professional engineers

## RELIABLE TECHNOLOGY

- Steel frame structure and internal supports
- Deep groove sealed bearings providing extra longevity
- Heavy-duty speed controller – safety feature to prevent the door from over speeding and causing injury

## DURABLE FEATURES

### FRAME

- Frame and ceiling of powder coated mild steel or brushed stainless steel
- Standard glazing of 8mm toughened curved glass
- Stainless steel brackets for the fixing of the curved glass
- Structural high density silicone for the glass surrounds

### WINGS

- Stainless steel spider at top and bottom for glass clamping
- Standard glazing of 12mm frameless toughened glass
- Stainless steel push handles
- Polypropylene brushes in anodised aluminium profile mounted on top, side and bottom of glass wings
- Night lock bolt fitted to one of the glass wings

## GUARANTEED MANUFACTURED TO LAST

- Zero maintenance
- 2 year guarantee

## THE GRASS IS ALWAYS GREENER

**A revolving door will save you money and help preserve the environment, one step at a time.**

That's because conventional hinged and sliding doors can allow up to 8 times as much airflow as a revolving door, which creates a draft block between the inside and outside of a building. Lowered air-conditioning and heating costs and a lower carbon footprint means that a Turnstar revolving door is a win-win solution.

# TECHNICAL NOTES

## DESIGN

- Modular bolt-together design for ease of transport and rapid installation. Components can pass through a standard door. Can be packed in broken-down form either onto a pallet or into a crate for transport
- Free standing structure which can be installed into a new or existing shopfront

## INSTALLATION REQUIREMENTS

- Fixing surface is to be level (tolerance +/- 5mm)
- Cannot be installed on an expansion joint
- Fixed to an existing floor by means of countersunk anchor bolts

# MANUFACTURING OPTIONS

## OPERATION

- Manual revolving door with speed controller
- Access control with locking mechanism and pressure mat (only on 3 wing configuration)

## WING OPTIONS

- 3 wing configuration (allowing a larger space whilst walking through the door but a smaller entrance into the door)
- 4 wing configuration (allowing a larger entrance into the door but a smaller space whilst walking through the door)

## LIGHTING

Low voltage LED downlighters (optional extra)

## FINISH OPTIONS

- Mild steel with UV resistant polyester exterior powder coat finish (white) ▲
- 304 grade brushed stainless steel
- 316 grade brushed stainless steel ■
- ▲ other colours available on request
- suitable for corrosive environments (details available on request)

Custom designs are available on request.
