

OUTLAW OPTICAL BARRIER FREE

AG-OPTIC 006

The Outlaw Industries Optical Turnstile series are American Made
With American Products by Patriotic American Craftsmen.

Description

The Outlaw Optical Barrier Free Turnstile Offers a non-obtrusive control of the movement of people in a building. Creating a boundary between private and public spaces, it allows access to a lobby or common area while controlling access for persons with qualifications to enter more private and secure areas of the facility.

Part of the Outlaw Optical series, Barrier Free has been designed to the highest standards, ahead of industry trends:

- Featuring state of the art design and technology
- Elegant looks to complement the surroundings
- Matching post and glass options
- User-friendly electronic guidance
- Options for alternative metals
- Our company's commitment to using electronics and metals Made in the USA

Customization

The Outlaw Barrier Free is available in a wide variety of color options. Whether making a statement or blending in with the architectural surroundings of the facility, our Barrier Free Turnstiles can be customized with a variety of metals from Stainless Steel, Copper, Brass, and Muntz. And options of all available Granite and Marbles on the market. There is also the Option of backlighting the stone.

Options

- Single lane or multiple lane set-up
- External control panel
