

catraxGO master

FEATURES of the CatRAX Go Master

- Sleek design, rounded corners, no exposed screws.
- Internal space protected with a secret key.
- Easily integrated with other control accessories.
- Side pictograms to indicate the direction of access.
- Upper pictogram indicating permission and access direction in high brightness RGB LEDs
- Large flow of passage due to the positioning of the readers (away from the locking mechanism).
- Electromagnetic rotation lock control generates less mechanical wear and longer product life.
- Motorized turning mechanism that follows the user's movement.
- Support for fixing the integration plates, allowing easy maintenance.
- Bearing mechanism with two bearings.
- Finished in carbon steel with powder epoxy paint or brushed stainless steel AISI 304.
