

## AG SERIES DROP-ARM TURNSTILES

Featuring a sleek architectural design with 304 Stainless Steel or Powder-Coated color finish, Outlaw Optical Drop-Arm Turnstiles help security staff manage and control the flow of people through a building. These units use sensors to monitor building entrances, dropping the barrier arms down into the cabinet upon authorized passage, then lifting them back into position.

### CONTROLS

#### AUTOMATIC

Arms drop simultaneously upon successful authentication

### FINISH

(PC) POWDER COATED  
(SS) STAINLESS STEEL
