EntraPASS is a powerful cloud-based access control solution utilizing industry renowned security management software

Brand	hattrix	brivo	Honeywell	DMP
Product summary	hattrix is a powerful cloud-based access control solution utilizing the industry renowned EntraPass security management software. hattrix empowers you to think differently about managing your security needs and saves you money year after year. Working with a hattrix Managed Service Provider, you can choose whether you want to outsource all or part of your security needs with a hosted or fully managed system.	Brivo Onair® combines access control and video surveillance to put you in control of your facilities. You can protect your people and property around the clock from anywhere and from any device. It's ideal for those looking to: Unlock doors remotely, Monitor who comes into the building, Manage multiple doors and locations, Restrict access to certain employees at specific times	MAXPRO Cloud is more than a security system. It's a dynamic business tool that lets you see what's happening at each of your locations whether they're local, regional or nationwide – giving you actionable insights you can use to improve service and drive down costs. • No server or software to buy and manage • Arm your business with data within one user interface • Monitor, manage, and measure all of your locations • Lock and unlock doors remotely • Make faster, smarter decisions that improve your bottom line	You can now combine management and control of all related access and security systems under a single software application. Entré is database and hardware independent, so you can bring various systems and multiple panels together, giving a consolidated view of the system. As a single, unified system, there's one badge, one face, or one fingerprint—worldwide.
