The **IX-DA Door Station** is an IP audio/video terminal for your secured door or entry. It communicates by intercom with the IX Series Master Station. This surface mount unit connects to a PoE network using CAT-5e/6 cable. The IX-DA will call up to 20 IX-MV masters or Instances of the IX MOBILE. The door station features a form C contact for door release, a 600-ohm output for paging or an amplified speaker, and a contact input.
