

Turnstile Buy-Back / Resale Program

As part of our Value-Added Service, www.TURNSTILES.us started www.UsedTurnstiles.com on July 28, 2004 to sell used Turnstiles that had been purchased for construction purposes only; that would be purchased for a period of time and then not needed after that.

To date, every Turnstile and Access Control System that has been posted on our site has sold within 4 months from the date of posting!!

How do we estimate the resale value of a Turnstile? First, much depends on the condition of the unit; here are a few ways...

Good to Excellent Condition:

If the Turnstile is in good to excellent condition we value the unit at 1/2 of a similar unit's current list price – we have been very successful at selling at this rate.

Fair Condition:

If the Turnstile is in working order mechanically, but not electrically, we value the unit to be 1/4 of the current retail price.

We will not accept a unit in less than Fair Condition – this would be considered scrap.

Our fees for re-selling your turnstiles typically are 38% of the sale – this covers our cost for handling fees and Internet posting costs. We will post photos of your units and link up the installation manuals, handle all telephone and email inquiries, and handle the freight as well. You're responsible for crating the units for shipping.

You will be paid before the unit leaves your possession! It's as easy as that! And our track-record speaks for itself. Every Turnstile posted has sold within 4 months!

We look forward to working with you, and if you have any questions, please call or email us anytime!

Sincerely yours,

Patrick McAllister
