

TX DUO Full Height Turnstile

quality
modern
competitive

CHARACTERISTICS

Ideal for environments that require trust, TX-DUO is made of high strength steel tubes: the structure and the arms provide greater security against tampering and vandalism. The device also offers full integration with market access controllers and features two rotating shafts with engine and control system, well known for its robustness and high performance.

Indicative LEDs available as an optional item (1) and internal lighting (2).

Arms in stainless steel at the point where users touch the equipment.

Rubberized bottom arm (3), provides impact protection to the user.

Treatment and finish allow for outdoor installation.

DIMENSIONS

TX-DUO is 7.4' wide, 7.3' high and 4.4' deep, saving 25% of floor space compared to conventional full height turnstiles.
