

SwingGate SG100 Stainless

Post Style Gates • Rounded Corners • One Way Swing • ADA & Custom Sized

SwingGate SG100

(36" ADA or custom sized widths from 20"-60")

**for Interior & Exterior
Applications**

Applications:

Handicap gates provide authorized access for easy entry and/or exit. They restrict traffic, provide handicap accessibility, and are frequently used as an access point for hand trucks, carts, and deliveries. Popular applications also include retail stores, schools, libraries, cafeterias, and health club facilities where inexpensive reliable security is required. Our SwingGates are designed to be paired with our matching turnstile models and can be configured to offer different levels of functionality based upon your needs and budget.

The SG100 is our most affordable, economically priced rounded corner, self-closing gate. The stainless steel frame is strong, durable and built tough for long lasting reliable performance. Includes a matching stop post, strike plate and floor flanges. The SG100 has a self-closing heavy-duty hinge with adjustable closer, a full size 36" clear ADA opening.

Available options include; an electric magnetic strike lock (integrates with access control systems), push-button activation (momentary or timer), wall mounting, custom sized widths (from 20"-60"), custom color matching and signage.

Post & Rail Options

Custom sized widths fill any open space.

Applications:

The SG100 is our most affordable, economically priced round-corner, self-closing gate. The stainless steel frame is strong, durable and built tough for long lasting reliable performance. Popular applications also include retail stores, schools, libraries, cafeterias, and health club facilities where inexpensive reliable security is required.
