

## Full-Height Portable Single Turnstile - Extra Wide 39" Passage

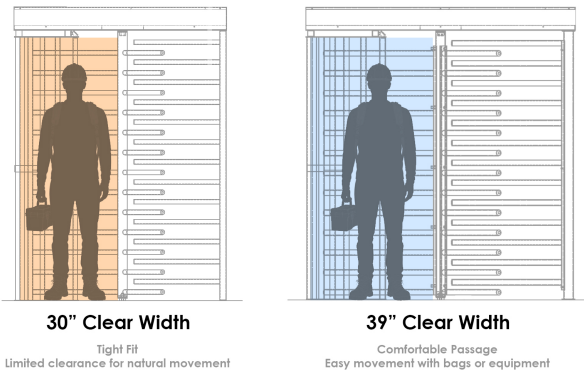

Our Full-Height Portable Turnstile with Extra-Wide 39" Passage combines a full-height tandem security turnstile with a heavy-duty forklift-movable steel base platform for temporary or relocatable access control applications.

Designed for rapid deployment, the unit is ideal for construction sites, government facilities, industrial locations, remote sites, and temporary security checkpoints not requiring permanent installations.

The turnstile assembly is secured directly to the steel base platform for simple transport and repositioning. Integrates with variety of access control devices and software.

### Turnstile Passage Comfort Comparison

### Key Features:

- Full-Height Security Turnstile
