

Full-Height Portable Tandem Turnstile

Our Full-Height Portable Tandem Turnstile combines a full-height tandem security turnstile with a heavy-duty forklift-movable steel base platform for temporary or relocatable access control applications.

Designed for rapid deployment, the unit is ideal for construction sites, government facilities, industrial locations, remote sites, and temporary security checkpoints not requiring permanent installations.

The tandem turnstile assembly is secured directly to the steel base platform for simple transport and repositioning. Integrates with variety of access control devices and software.

Key Features:

- Full-Height Security Turnstile
- Pre-assembled
- Heavy-duty secured to base
- Portable forklift base platform
- Lift points for transport by crane
- 110V or 220V operation
- Additional options available

Base Plate Footprint Size: 108" x 71.2"

Overall Size: 7'7" Tall x 9' Wide x 6' Deep
