

Federal Inspection Station, San Diego International Airport

316-GRADE STAINLESS STEEL

Architectural Partition Walls and Gates

Toronto International Airport

Cut Flanges permit mounting flush to walls.

Eliminate core drilling with a **Magnetic Mount**.

Push Plates protect gates.

Kick Plates protect gates.

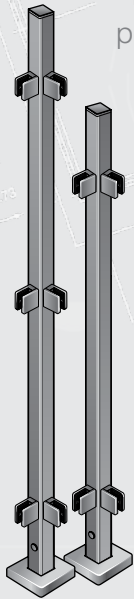

Our modular, stainless steel and glass/plexi partition wall system installs quickly and easily.

- Permanent or removable installation.
- Magnetic-base option makes installation quick and easy — No floor drilling required.
- Locking gates provide secure access control.
- Modular system includes 4 standard heights — 42", 48", 60", and 72" — to fit almost any space or need.
- Available frosted panels provide privacy.
- Corrosion-resistant, 316-grade stainless steel creates an architectural statement both indoors and out.

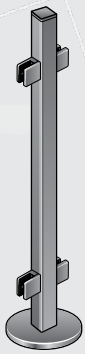

Provide security, access control, and pedestrian flow.

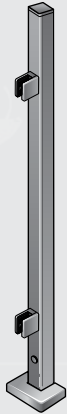

4 heights, 3 mounting options, endless possibilities.

Flange Mount

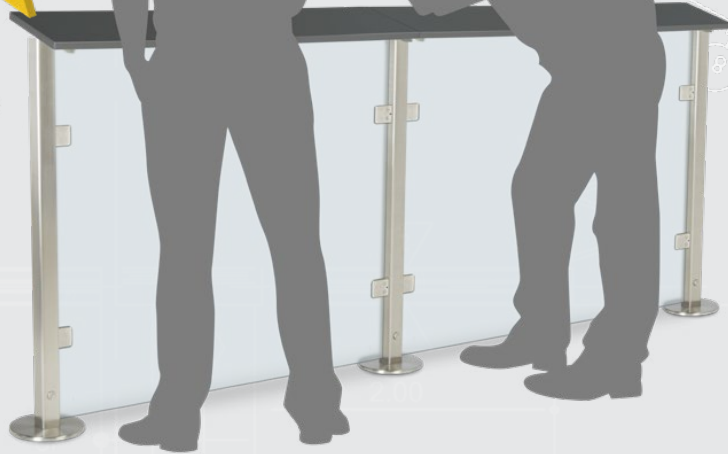

Magnetic Mount

Cut Flange Mount

Table rotates to any angle, providing a convenient surface.

Optional Table-Top

Perfect for food and beverage service
