

Push Button Control Station - Start (1NO, 22mm)

Commonly Used with Turnstile Control Systems

Product Overview

The TURNSTILES.us Push Button Control Station is a compact, industrial-grade control device designed for reliable start command activation in access control and automation systems.

Built around standard 22mm mounting architecture, this unit integrates with systems for turnstiles, gates, and controlled entry.

Electrical & Functional

Contact Type: 1NO (Normally Open)
Function: Start (momentary push button)
Number of Operators: 1
Mechanical Operation: Push Button

Dimensions

Height: ~3.5 in
Width: ~2.5 in
Depth: ~2.6 in
Mounting Hole Diameter: 22 mm

Material & Construction

Enclosure Material: Industrial-grade Plastic
Color: Gray housing with black/green push button
Mounting Type: Surface mount control station

Key Features

- Start push button with 1 Normally Open (1NO) contact
- Standard 22 mm mounting compatibility
- Durable enclosed control station housing
- Compact surface-mount design
- Reliable momentary operation
- Suitable for indoor industrial and commercial use

Applications

- Turnstile and access control systems
- Industrial machinery start controls
- Entry/exit control stations
- General automation control interfaces

Notes

Based on standard 22mm industrial control station components
Compatible with common access control integrations
