

TUS-PTD Pass-Through Door with Lock

Description:

Intensive-use detention food pass-through doors are designed to allow for the transfer of items through cell doors. Designed with safety and security in mind, our pass-throughs provide a secure way to transfer items between rooms. Constructed from 12 gauge stainless steel, the food pass-through door includes a heavy duty hinges and wall flange for a finished look and added tamper resistance. Custom sizes available. May be ordered without lock if required.
