

Low-Profile Walkthrough Metal Detection System

BallistiSCAN discreet sensors provide powerful detection technology without the imposing feel of overhead walkthrough metal detectors.

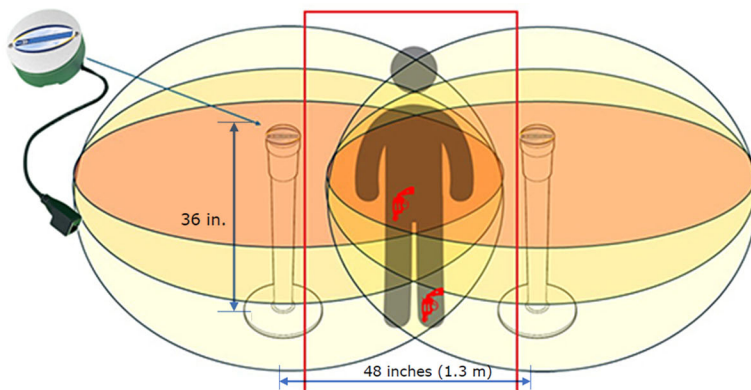

Key Features

- Detects concealed weapons, knives, and vape devices using MAD + DSP
- Low-profile design; deploys in minutes, weighs ~17–20 lbs, fits in car trunk
- Indoor/outdoor operation (–10°C to 50°C / 14°F to 122°F)
- Two sensors (32–48" apart); mount on stands, inside walls, or turnstile cabinets
- Auto-calibration with adjustable detection (3' radius, 6 ft full coverage)
- Touchscreen controller with real-time settings and diagnostics
- Built-in Wi-Fi router for remote access and optional network monitoring
- USB charging ports for auxiliary devices (model dependent)
- Relay output for integration with gates, turnstiles, and alarms
- Supports multi-unit, parallel installation for wide-lane coverage

| ✓ Minimal Footprint | ✓ Installs in Minutes |
| ✓ Simple Mounting | ✓ Military-Grade Accuracy |

Detection Range

- Detects ~3 ft radius, adjustable on-center or to side
- Reporting is most sensitive on overlap (red)

Touchscreen Controller

- Real-time settings and diagnostics
- Wireless connectivity access
- Relay output for integration
